High School

Throughout term 1, Year 8 have been working on a business proposal outlining a company they would like to start. They were given complete freedom in determining what the business was to be and there was good variety.

Students pitched their ideas and financial plans to a panel made up of management and staff with a view to having their proposals accepted. Their sponsor/s would then support them in making the business work.

As in the real world (!!) the students were told that should their business idea not spark the interest of a sponsor the business will be dissolved and the participants would need to apply for jobs with another business.

Below are our young entrepreneurs businesses.
